The Dual Properties Of Light

Atom & Molly

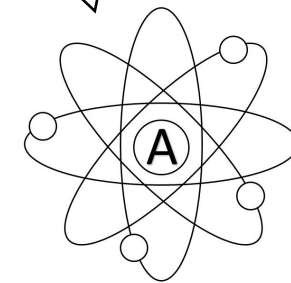

“The World’s First Sub-Atomic Comic”®

Did you know
that light behaves
both like a wave
and like a
particle?

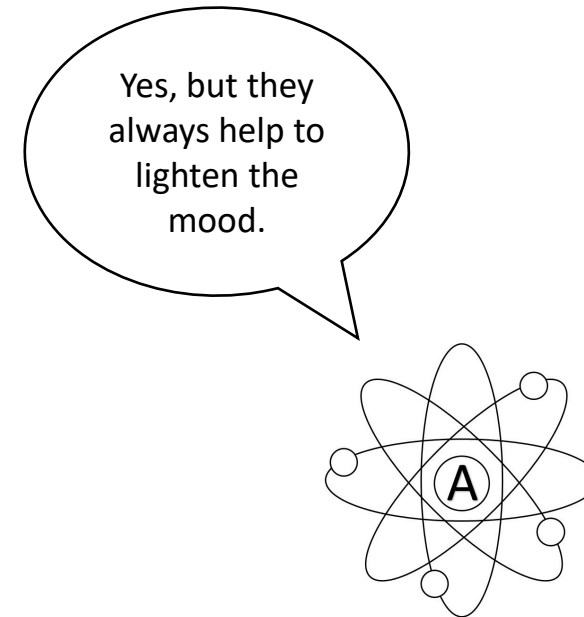

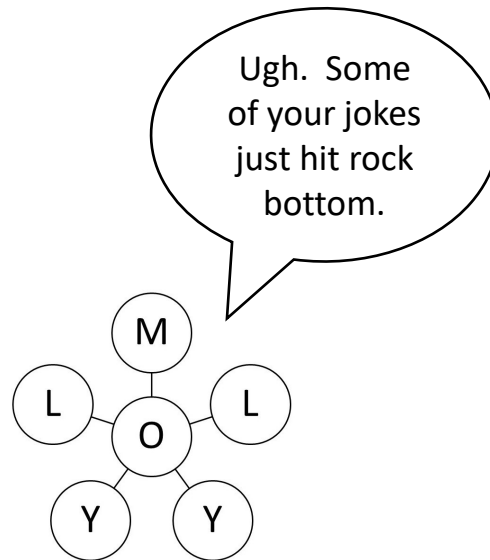

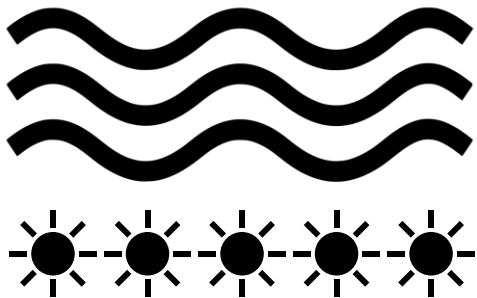

Wow! That’s
a heavy
concept to
grasp!

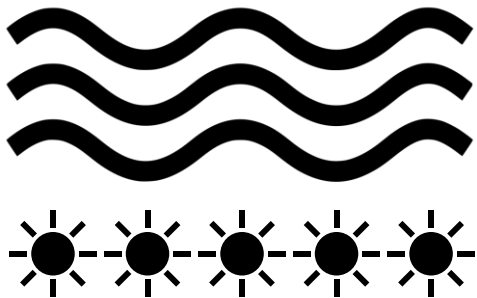

Atom & Molly

“The World’s First Sub-Atomic Comic”®

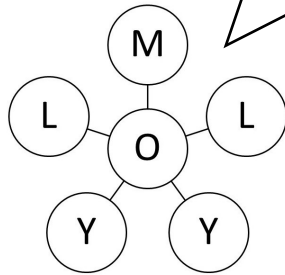

Atom & Molly

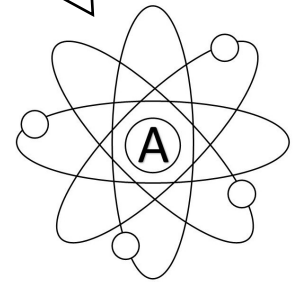

“The World’s First Sub-Atomic Comic”®

So ... getting back to the science. Light acts like a wave because it has length, known as wavelength. It also has frequency and velocity.

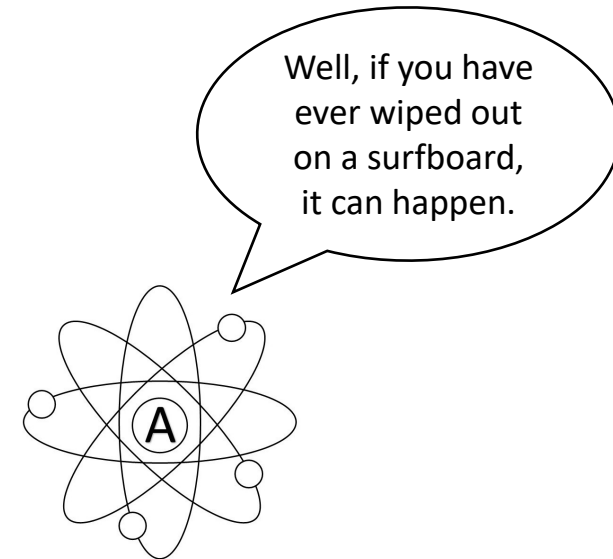

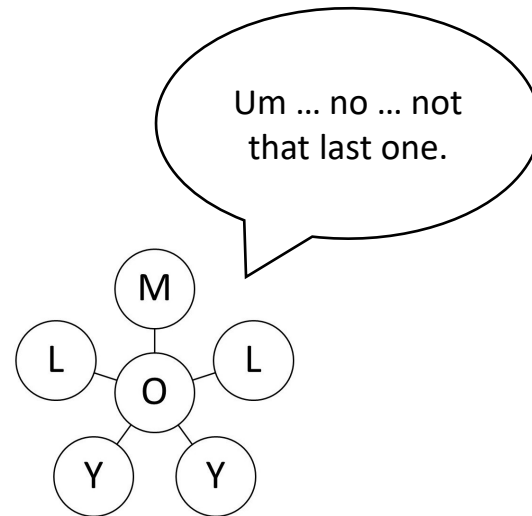

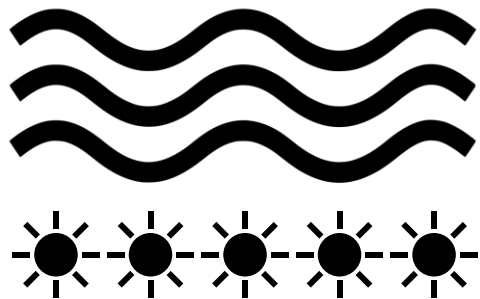

And like a wave, it can be reflected, refracted, diffracted, interfered, and ingested.

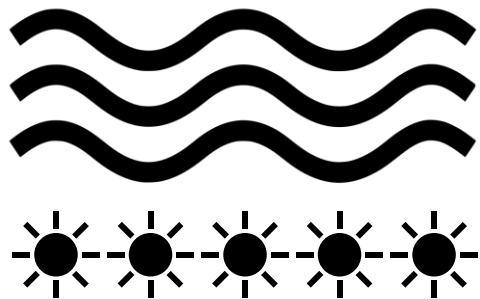

Atom & Molly

“The World’s First Sub-Atomic Comic”®

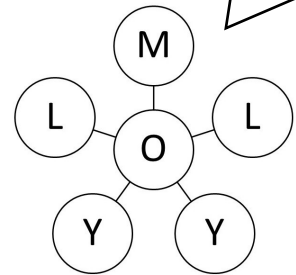

Atom & Molly

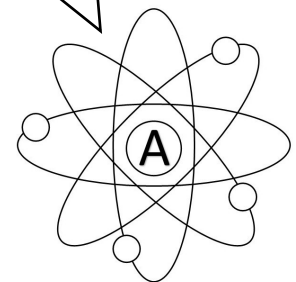

“The World’s First Sub-Atomic Comic”®

Light acts like a particle
– known as a photon –
because of the way light
interacts with matter.

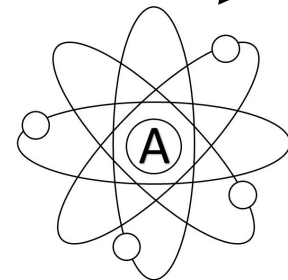

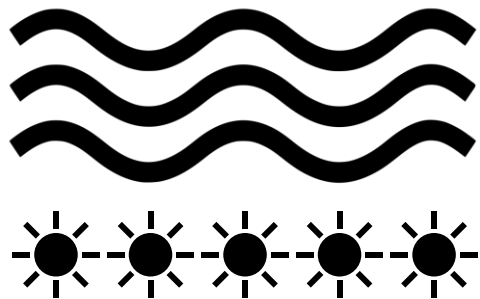

Photons are just
little packets of
light: they have
no mass, only
energy.

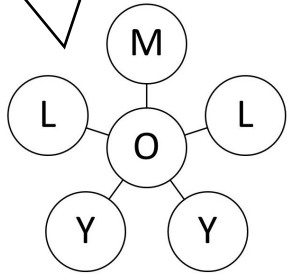

Atom & Molly

“The World’s First Sub-Atomic Comic”®

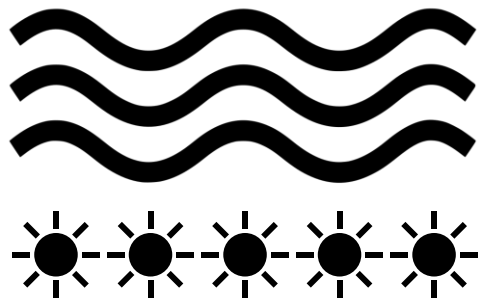

Photons are like the opposite of me on Sundays.

You’re probably not the only one who feels that way.

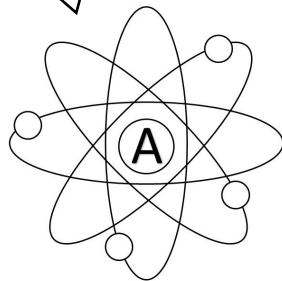

Atom & Molly

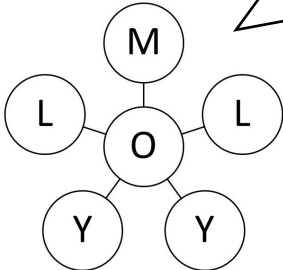

“The World’s First Sub-Atomic Comic”®

So, light is quite the doubly-interesting concept, acting like a wave and a particle.

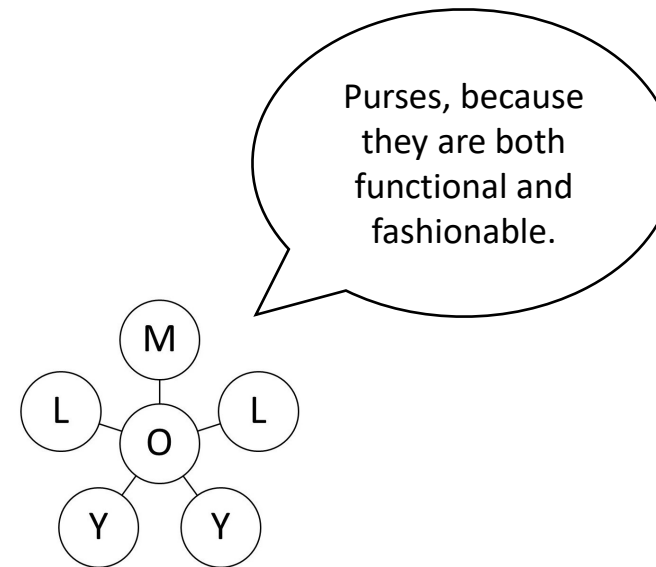

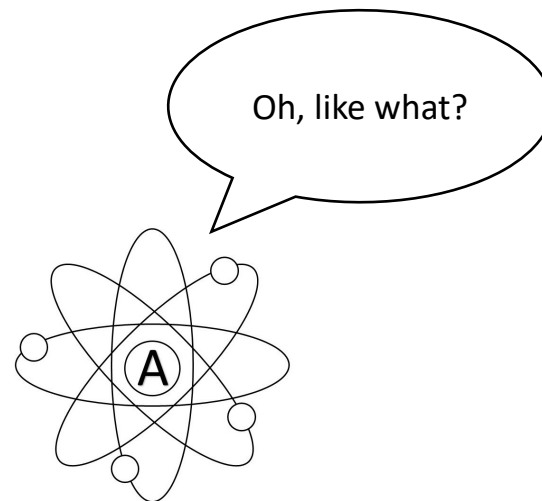

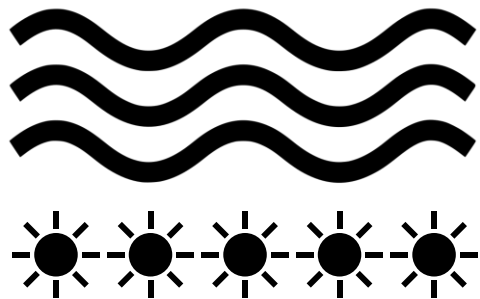

Yes, just like other dual-concept objects.
